SUBJECT: PROJECT PRESENTATION 3

LECTURER: MRS PRIMA INDERIAL

DUE DATE: 30 OCTOBER 2026

AGILE TEAM CHARTER

1.

1.1 Team Purpose

Our team is united by a clear objective and a shared vision that drives every decision, design, and deliverable we produce throughout the project lifecycle.

1.2 Define the Objective

Our primary objective is to design, produce, and sell affordable, high-quality ICT-branded clothing and merchandise for students enrolled in the Information and Communication Technology programmes at CPUT. We are addressing a clearly identified social and financial problem: many students from disadvantaged backgrounds rely solely on NSFAS living allowances and cannot afford suitable, presentable clothing for campus attendance.

By providing branded T-shirts, hoodies, caps, and accessories priced between R120 and R240, we aim to:

- **Relieve financial clothing pressure** on NSFAS-dependent ICT students by offering affordable, high-quality branded apparel they can wear throughout the academic year.
- **Create departmental identity and unity** by developing ICT programme-specific designs that foster pride, belonging, and a shared sense of community among students across all ICT disciplines.
- **Improve campus attendance and confidence** by eliminating clothing-related self-consciousness that contributes to absenteeism and reduced academic performance.
- **Operate a viable student-run micro-business** that is self-sustaining, scalable, and capable of growing alongside student demand over successive academic terms.

1.3 Vision Statement

Our vision goes beyond selling clothing; it speaks of the deeper impact we want to have on the ICT student community and what genuine success looks like for us.

Our vision statement encapsulates the heart of our purpose:

> ***"To empower every ICT student at CPUT with affordable, identity-driven branded apparel that builds pride, fosters unity, and removes the financial barrier between a student and their full participation in campus life."***

Success, in the context of this project, looks like a self-sustaining student-run business that sells out each production batch through pre-orders, generates consistent demand across multiple product categories, and becomes a recognized symbol of ICT student identity on campus. It means students wearing the product with pride, feeling represented by their programme's branding, and experiencing a tangible reduction in the financial and emotional burden of dressing for campus.

We measure success not only by units sold and revenue generated, but by the degree to which our product strengthens the social fabric of the CPUT ICT student community.

While we are starting within the ICT department, our long-term ambition is to expand across other faculties at CPUT. We are not rushing that growth we are building this business brick by brick, making sure every step is solid before we take the next one.

2.

2.1 Team Roles & Responsibilities

Name	Role	Responsibilities
2.1.1 Siphokuhle Millior Angela Nyana	Agile Lead / Project Manager & Database Developer	Conducts daily stand-ups, manages the Kanban board, organizes sprint planning sessions, distributes work tasks to the team, makes sure that the team completes all deadlines and deliverables, and is responsible for the application database design.

2.1.2 Athini Ngquke	Researcher, Branding Lead & Back-end developer	Performs market research to help with the business case, coordinates branding, which includes the name of the brand, colours, and font type for ICT Threads, and is responsible for the backend of the software product.
2.1.3 Mihle Nosilela	Editor, Tester, Database Developer	Review and edit all documents created by the team for accuracy, clarity, and professional appearance. Testing of the site for any errors or bugs in the program features and is responsible for the application database design.
2.1.4 Sinobawo Nkomo	Designer, Back-end developer	Designs graphics for ICT Threads products. Participates in the decision-making process during the front-end development phase to ensure consistency between the design and the finished product and is responsible for the back end of the application.
2.1.5 Ricardo Mukwevho	Front-end Developer(Functionality) & Analyst	Manages the functions for the ICT Threads website frontend. Manages interactivity, logic, and behaviour of the components through

		Java. Collaborates with Olwethu, who takes care of HTML/CSS. Analyses internal and external data to make decisions about products and business operations.
2.1.6 Olwethu Mtwazi	Front-end Developer (HTML/CSS) & Scribe	Works on the Figma wireframe, uses HTML and CSS to design and style the front end of the ICT Threads website. Documents the minutes after each daily stand-up meeting.

2.2 Additional notes on role allocation:

- Everyone on the team is given tasks based on their role, and they are required to complete them by the end of the sprint.
- All team members participate in the Deployment phase.

3. Team Values and Principles

3.1 Values

Value	Description	How It Shows in Practice
Collaboration	Working together across roles to achieve shared goals.	Daily stand-ups, joint design reviews, and open feedback loops between developers, designers, and analysts.
Respect	Valuing each member's ideas, time, and contributions.	Listening actively during meetings, acknowledging effort, and resolving disagreements constructively.
Transparency	Keeping communication open and honest.	Sharing progress updates on Teams and WhatsApp,

		documenting sprint outcomes, and reporting blockers early.
Accountability	Taking ownership of tasks and deliverables.	Meeting deadlines, regularly updating the Kanban board, and following through on commitments.
Innovation	Seeking creative solutions to student needs.	Designing unique ICT-branded apparel and improving the website's usability through iterative testing.
Empathy	Understanding the challenges faced by ICT students.	Ensuring affordability and inclusivity in product design and pricing decisions.
Continuous Improvement	Learning from each sprint to refine processes and outcomes.	Conducting retrospectives after each milestone to identify what worked and what can be improved.

3.2 Principles

- Customer involvement – Customers should be closely involved throughout the development process. Their role is to provide and prioritize new system requirements and to evaluate the iterations of the system.
- Embrace change – Expect the system requirements to change, and so design the
  system to accommodate these changes
- People not process – The skills of the development team should be recognized and exploited. Team members should be left to develop their own
  ways of working without prescriptive processes.
- Maintain simplicity – Focus on simplicity in both the software being developed and in the development process. Wherever possible, actively work
  to eliminate complexity from the system

4.

4.1 Communication methods

The team will be using multiple communication platforms to ensure effective communication, collaboration, transparency, and continuous progress throughout the project. These are the communication methods we will be using:

- Microsoft Teams calls for formal discussions, planning sessions, and progress reviews
- WhatsApp calls and text messages for quick updates, reminders, and urgent communication
- Face-to-face meetings when possible, to discuss design decisions and resolve complex issues

Using multiple platforms allows the team always to remain connected and responsive.

4.2 Meeting schedule and frequency

The team will conduct daily stand-up meetings from Monday to Friday at 18:00 pm. These meetings are short and focused, following Agile principles to track progress and identify challenges.

During each stand-up meeting, every team member will discuss:

- What they have completed since the previous meeting
- How far they are with their assigned tasks
- Any challenges or blockers they are facing
- What they are planning to work on next and how they aim to improve their work

In addition to daily standups, extra meetings will be scheduled when necessary, especially before major deadlines or milestones.

4.3 Communication Expectations

All team members are expected to:

- Attend scheduled meetings on time
- Communicate progress honestly and clearly
- Respond to messages within a reasonable time

Notify the team in advance if they are unable to attend a meeting

5. Goals and Milestones

5.1 SMART goals

Goal	Specific	Measurable	Achievable	Relevant	Time-bound
1. Launch the ICT Threads MVP website	Develop and deploy a functional e-commerce site for ICT-branded apparel	Websites live with at least 3 product categories	Team includes front-end, back-end, and database developers	Supports the team's purpose of empowering ICT students	**By 30 October 2026**
2. Complete branding and product design	Finalize logo, color palette, and apparel prototypes	Branding approved and 3 sample designs ready	The branding lead and designer collaborate	Builds departmental identity and unity	**By 17 July 2026**
3. Conduct market analysis and pricing strategy	Research student preferences and affordability	Survey at least 30 ICT students; finalize price range R100–R350	Researchers and analysts lead the task	Ensures affordability and relevance	**By 24 July 2026**
4. Develop and test the database and backend	Create a secure, scalable database and backend logic	Database passes all test cases	Database developers and testers assigned	Supports sustainable business operations	**By 30 September 2026**
5. Deploy and evaluate	Launch pilot and collect	Minimum 20 user	Team conducts	Improve product quality and	**By 30 October 2026**

user feedback	feedback from users	responses collected	deployment and testing	user satisfaction	

5.2 Milestones

Phase	Duration	Key Deliverables	Responsible Roles
Branding	14-17 July 2026	Logo, color scheme, brand identity	Branding Lead (Athini), Designer (Sinobawo)
Analysis	21-24 July 2026	Market research report, pricing model	Analyst (Ricardo), Researcher (Athini)
Development	28 July-3 Sept 2026	Functional website prototype, database integration	Developers (Sinobawo, Olwethu, Mihle)
Deployment	8 Sept-1 Oct 2026	Website launch, user testing, feedback collection	Entire team
Team Backlog & Meetings	14 July-1 Oct 2026	Daily stand-ups, sprint reviews, retrospectives	Agile Lead and scribe (Siphokuhle and Olwethu)
